

Sumer

*Invention of
Irrigation*

*Invention of
Cuneiform*

Add your own research information about each invention by the Sumerians or use the information given below.

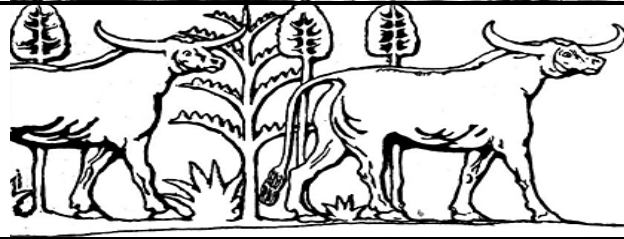

If you use the information below, glue the pages below onto the inside tabs.

Be sure you glue the inside pages above or below the cut line between the two tabs because you will cut on the solid bold line to form two tabs.

Glue the ziggurat picture on the inside front of this page so that one more invention of the Sumerians can be noted. With the inside of the book open and facing up, fold in right side, then fold in left side.

This middle section is glued to your page.

The ancient civilization of Sumer was located on the east side of the Euphrates River. Inventing the irrigation system that channeled water to the crops and the plow allowed them to farm and feed a growing population.

The Sumerians invented a form of writing known as cuneiform which they carved onto clay tablets.
