

This is a large graduated book and uses lot of beautiful color and that means ink..we love color and some of the colors of the magnificent creation we think at times just can't be duplicated.

So this front page is for your creation (color) and the last two are creation by the Creator.

Each page is divided up as follows: Page 2 Top layer is "Crustaceans". Write that at the very bottom. The second layer on Page 2 or the bottom is "Unusual Fish". Write the name of that group at the very bottom.

Page 3 Top layer that group is "Reef Fish" . Write that name at the very bottom and the bottom layer is "Reptiles or Marine Reptiles" which ever way you want to layer that group.

Then there is the white area under each picture. Write the name of the animal and the names are labeled at the top . The first name is for the picture on top and the second name is for the picture on the bottom. Cut out , layer going from shortest book to longest and staple and glue to your page.

Hermit Crab - Leafy Sea Dragon [Pic Att.](#)

Arrow Crab - Wolf eel Fish (not an eel)

Anemone Crab - Trumpet fish

Orange Lined Trigger Fish - Green Sea Turtle
