

# Inventions

-Connecting borders  
of the United States.-

# Telephone

List a few facts about each invention and then staple. Each of these inventions mentioned on the FBI's site helped to promote the growth of the United States.

From the site:

The United States was well united, with its borders stretching from coast to coast and only two landlocked states left to officially join the union. Inventions like the telephone, the telegraph, and the railroad had seemed to shrink its vast distances even as the country had spread west.

After years of industrializing, America was wealthier than ever, too, and a new world power on the block, thanks to its naval victory over Spain.

Cut out book, staple on left.
